- **Software Developer Engineer**
Full time
Jan 2021 - Oct 2021
- **Software Developer Trainee**
Full time
Jan 2020 - Jan 2021

As a software developer engineer, I contribute in:

- I worked in Front-End with template-forms and reactive forms validations with regular expressions.
- I implemented an internal tagging system using WYSIWYG (CKEditor).
- Also created modules for client claims and ticketing systems.
- In Back-End, I worked on the creation and integration of endpoints of data management.
- Improvement of the web system functionality by mitigating bugs.

Tools & frameworks used:

- Javascript
- Node JS
- AngularJS, Angular +2, Angular material
- Typescript
- Rxjs
- Lodash
- CKEditor
- HTML, Sass
- Mongo DB
- Git, Bitbucket, Jira, Unix terminal
